Benchmark Index	Nifty 500
Minimum Application Amount	New Purchase: ₹ 1,000 Additional Purchase: ₹ 1,000 Monthly SIP: ₹ 1,000 Quarterly SIP: ₹ 3,000

New Year's message from our CEO, Neil Parag Parikh

Dear co-investors,

First of all, sincere thanks for believing in long-term investing and also for believing that PPFAS Mutual Fund can help you achieve your long-term financial goals.

2016 was a fairly eventful year for us.

For one, our flagship scheme completed three years of operation on May 28th. We also crossed the 10,000 Folio mark in December.

The role played by our Distribution partners in helping us attain this number, cannot be overstated. During the past ten months, their contribution has increased from 2 percent to 10 percent in our overall growth. I ardently hope this increases to 50% in due course.

Second, we also changed the scheme's name from PPFAS Long Term Value Fund to Parag Parikh Long Term Value Fund, as a mark of homage to our founder Late Shri Parag Parikh whose vision and actions have been instrumental in where we stand today.

I am also delighted to inform you that our **Asset Management Company has attained the minimum net worth of Rs. 50 crores mandated by SEBI**, well before the requisite deadline, thereby allaying the fears of many well-wishers.

Accompanying this good news for our AMC is some happy news for us as co-investors in our scheme.

With effect from the first day of 2017, we have reduced our total expense ratio chargeable to the scheme, by 20 basis points, to 1.80 per cent p.a. for the Direct Plan and to 2.30 per cent p.a. (exclusive of Service Tax). This will lead to savings of Rs. 20 lakhs per Rs. 100 crores of AUM.

I believe that through our Scheme's design and prudent approach to fund management, we are progressing steadily towards fulfilling our Founder's vision of being the first choice of long-term investors. However, as always, we believe the pace of growth should be steady. Abnormal growth, though exhilarating, is not sustainable.

In keeping with our approach of preferring the digital to the terrestrial, we are on the verge of launching our Mobile App. Titled 'Self Invest', it will empower, both, new and existing investors to transact and view their Accounts seamlessly.

We are also contemplating several on-ground and online activities for 2017. This will include reaching out to promising new cities and regions within the country. We will communicate these closer to the date.

The year ahead will not be without its challenges but your continued faith gives us strength and confidence to move ahead on the road less travelled.

I sign off by extending my best wishes to you and your family for the year ahead.

Neil Parag Parikh

Chairman and Chief Executive Officer

About the Fund

Parag Parikh Long Term Value Fund (PLTVF) is an open ended equity oriented scheme with flexibility to invest a minimum of 65% in Indian equities and up to 35% in overseas equity securities and domestic debt / money market securities.

The core portfolio of PLTVF consists of equity investments made with a long term outlook and the factors considered while investing are quality of management, quality of the sector and the business (return on capital, entry barriers, capital intensity, use of debt, growth prospects etc) and the valuation of the companies. The endeavor of the fund management team is to identify opportunities for long term investments. However there are times when the opportunities are not attractive enough. While waiting for attractive opportunities, the fund invests in arbitrage opportunities between the cash and futures equity markets and special situations arbitrage where open offers / delisting / merger events have been announced. Investments are also made in money market / debt securities while waiting for deployment in core equity investments.

Foreign equity investments

The fund invests in foreign equity securities. Since investors in PLTVF look for capital investment and returns in Rupee terms, PLTVF also looks at delivering in Rupee terms. PLTVF hedges most of the currency exposure using currency futures.

Outlook

As usual, our investment stance does not depend much on the macro-economic situation but is focussed on individual companies. We have about 9% in cash holdings and arbitrage positions which can be deployed in long term investments at appropriate levels.

It is futile to predict market bottoms / tops or to time the market. One's investment horizon should be long enough to ride out the volatility. A staggered investment over time or a Systematic Investment Plan (SIP) is always better than a lump sum investment.

We have our Skin in the Game

The combined holding of 'Insiders' in Parag Parikh Long Term Value Fund amounts to **13.11% of the AUM as at December 30th, 2016**. For more details please visit the '[Scheme](#)' section of our website.

Definitions

Fund Manager	An employee of the asset management company such as a mutual fund or life insurer, who manages investment of the scheme. He is usually part of a larger team of fund managers and research analysts.
Application amount for fresh subscription	This is the minimum investment amount for a new investor in a mutual fund scheme.
Minimum additional amount	This is the minimum investment amount for an existing investor in a mutual fund scheme.
SIP	SIP or systematic investment plan work on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹500 every 15 th of the month in an equity fund for a period of three years.
NAV	The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.
Benchmark	A group of securities, usually a market index whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmark include the Nifty, Sensex, BSE200, BSE500, 10-year Gsec.
Entry Load	A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchase the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at Rs 101.
Exit Load	Exit load is charged at the time of redeeming (or transferring an investment between schemes). The exit load percentage is deducted from the NAV at the time of redemption (or transfer between schemes). This amount goes to the Asset Management Company and not into the pool of funds of the scheme.
Standard Deviation	Standard deviation is a statistical measure of the range of an investment is performance. When a mutual fund has a high standard deviation, its range of performance is wide implying greater volatility.
Sharpe Ratio	The Sharpe Ratio named after its founder, the Nobel Laureate William Sharpe is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
Beta	Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
AUM	AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.
Holdings	The holding or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in term of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.
Nature of Scheme	The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.
Portfolio Turnover Ratio	A measure of how frequently assets within a fund are bought and sold by the managers. Portfolio turnover is calculated by taking either the total amount of new securities purchased or the amount of securities sold - whichever is less - over a particular period, divided by the total net asset value (NAV) of the fund. The measurement is usually reported for a 12-month time period.

This product is suitable for investors who are seeking long term capital growth.

Investment objective of the scheme

The investment objective of the Scheme is to seek to generate long-term capital growth from an actively managed portfolio primarily of Equity and Equity Related Securities. Scheme shall invest in Indian equities, foreign equities and related instruments and debt securities.

Investors should consult their financial advisers if in doubt about whether this scheme is suitable for them.
