

Managing your money using **Value Investing** principles!

### About Parag Parikh Flexi Cap Fund (Please visit Page 2)

Parag Parikh Flexi Cap Fund (PPFCF) is an open ended equity oriented scheme with flexibility to invest a minimum of 65% in Indian equities and up to 35% in overseas equity security and domestic debt / money market securities.

The core portfolio consists of equity investments made with a long term outlook and the factors considered while investing are quality of management, quality of the sector and the business (return on capital, entry barriers, capital intensity, use of debt, growth prospects etc) and the valuation of the companies. The endeavor of the fund management team is to identify opportunities for long term investments. However there are times when the opportunities are not attractive enough. While waiting for attractive opportunities, the fund invests in arbitrage opportunities between the cash and futures equity markets and special situations arbitrage where open offers / delisting / merger events have been announced. Investments are also made in money market / debt securities while waiting for deployment in core equity investments.

### Foreign equity investment

The fund invests in foreign equity securities. Since investors in PPFCF look for capital investment and returns in Rupee terms, PPFCF also looks at delivering in Rupee terms. PPFCF hedges most of the currency exposure using currency futures.

### Outlook

We continue to look at individual investments on their own merits and will not hesitate to invest if an opportunity looks attractive. As usual, our investment stance does not depend much on the macro-economic situation but is focussed on individual companies. We have about 17.24% in cash holdings, debt & money market instruments and arbitrage positions which can be deployed in long term investments at appropriate levels.

# Parag Parikh Tax Saver Fund

An open ended equity linked saving scheme  
with a statutory lock in of 3 years and tax benefit

An India-centric Scheme  
suitable for long-term  
wealth creation

## Heritage

The Scheme is the third Offering from PPFAS Mutual Fund. The Fund, launched its first ever scheme in 2013, prior to launch Parag Parikh Tax Saver Fund in the year 2019 and is recognised for its focus on equity investing, low portfolio turnover and relatively conservative approach to money management. The Fund has been sponsored by Parag Parikh Financial Advisory Services Limited, a Company, which is a SEBI Registered Portfolio Manager since 1996.

### PPFAS Mutual Fund's investment approach: We are guided by the timeless principles of Value Investing

We view equity investing as purchasing stakes in businesses, rather than merely investing in pieces of paper.

However much we like a Company, we avoid overpaying.

We prefer purchasing cash generating, low debt businesses

We like to partner with Managements who take care of the interests of minority-shareholders.

We stay away from periodic fads and fancies in the stockmarket, whether they be businesses, sectors or themes

We do not shy away from parking money in cash / cash equivalents in case we believe that valuations are stretched.

**We employ the same investment approach in Parag Parikh Tax Saver Fund.**

### An India-centric Scheme

↳ At least **80%** of the Parag Parikh Tax Saver Fund's corpus will be invested in Indian equities.

#### It has the freedom to:

- ↳ Invest in stocks of small, medium and large-sized Companies based in India.
- ↳ Invest in any sector or industry within India which appears to be attractively valued
- ↳ Participate in buy-backs and other special situations within India.

There's only one right way®

## About the Scheme...

It is an open-ended Equity Linked Savings Scheme (ELSS) with a statutory lock-in of 3 years and tax benefit from the date of investment for every investment instalment.

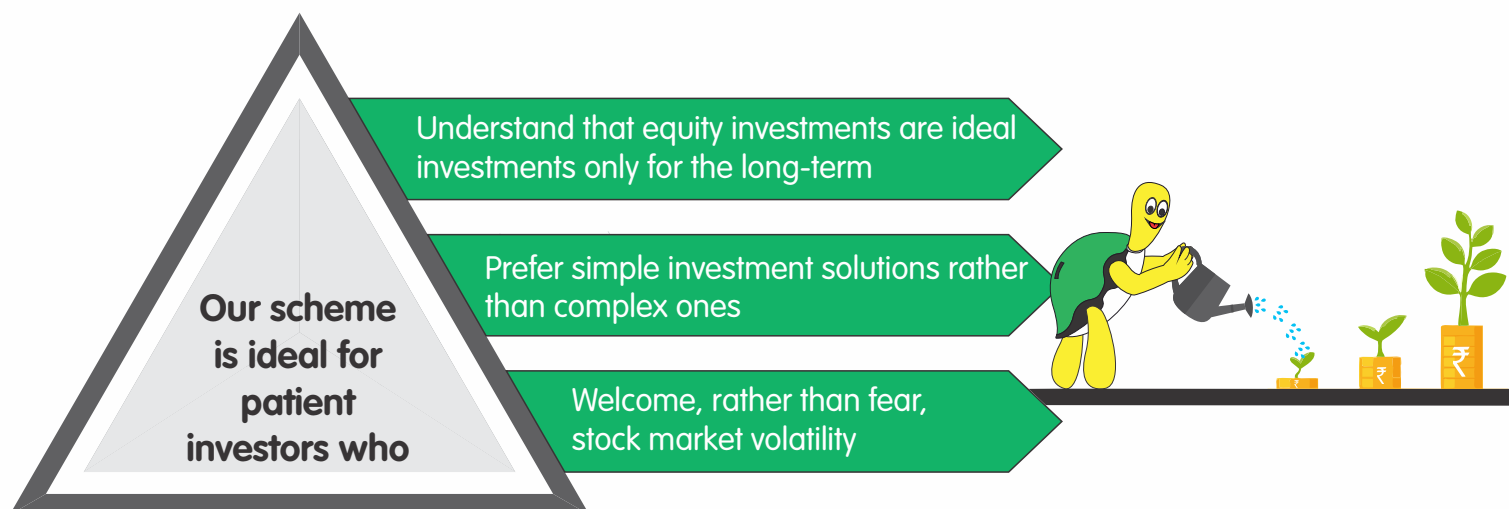

Indian investors who invest in this Scheme are eligible for Income Tax deduction u/s 80C upto a sum of Rs. 1.50 lakhs. However, this is not a ceiling. Amounts beyond that can also be invested in the Scheme.

**While the income tax relief is certainly beneficial to many, the Scheme's other attributes mean that it could also be attractive to those who have exhausted this limit.**

**Also, we have always maintained that equity investments are best suited for investors who can remain invested for at least five years. The three year lock-in in Parag Parikh Tax Saver Fund is much lower than this, and therefore should not deter you.**

It enjoys the same Capital Gains Tax benefits as available to other equity oriented schemes (viz. Gains will be taxed at a flat rate of 10%\*)

\*As per Income Tax Rules prevailing for the Financial Year 2022-23

### Parag Parikh Tax Saver Fund will not suit you:

If you require to redeem within three years period from date of the investment.

If you are not comfortable with volatility in the Net Asset Value

If you depend on periodic income in the form of mutual fund dividends

## Fund Managers

**Rajeev Thakkar**  
CIO & EQUITY FUND MANAGER

**Raunak Onkar**  
HEAD - RESEARCH & CO-FUND MANAGER

**Raj Mehta**  
FUND MANAGER - DEBT

**Rukun Tarachandani**  
EQUITY FUND MANAGER

The AMC (including its affiliates), the Mutual Fund, the trust and any of its officers, directors, personnel and employees, shall not be liable for any loss, damage of any nature, including but not limited to direct, indirect, punitive, special, exemplary, consequential, as also any loss of profit in any way arising from the use of this material in any manner. The recipient alone shall be fully responsible/are liable for any decision taken on this material.

## Definitions

<b>Fund Manager</b>	An employee of the asset management company such as a mutual fund or life insurer, who manages investment of the scheme. He is usually part of a larger team of fund managers and research analysts.
<b>Application amount for fresh subscription</b>	This is the minimum investment amount for a new investor in a mutual fund scheme.
<b>Minimum additional amount</b>	This is the minimum investment amount for an existing investor in a mutual fund scheme.
<b>SIP</b>	SIP or systematic investment plan work on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15 <sup>th</sup> of the month in an equity fund for a period of three years.
<b>NAV</b>	The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.
<b>Benchmark</b>	A group of securities, usually a market index whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmark include the Nifty, Sensex, BSE 200, BSE 500, 10-year Gsec.
<b>Entry Load</b>	A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchase the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.
<b>Exit Load</b>	Exit load is charged at the time of redeeming (or transferring an investment between schemes). The exit load percentage is deducted from the NAV at the time of redemption (or transfer between schemes). This amount goes to the respective scheme and gets added to the AUM of that Scheme
<b>Standard Deviation</b>	Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund Scheme has a high standard deviation, its range of performance is wide implying greater volatility.
<b>Sharpe Ratio</b>	The Sharpe Ratio named after its founder, the Nobel Laureate William Sharpe is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
<b>Beta</b>	Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
<b>AUM</b>	AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.
<b>Holdings</b>	The holding or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in term of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.
<b>Nature of Scheme</b>	The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.
<b>Portfolio Turnover Ratio</b>	A measure of how frequently assets within a fund are bought and sold by the managers. Portfolio turnover is calculated by taking either the total amount of new securities purchased or the amount of securities sold - whichever is less - over a particular period, divided by the total net asset value (NAV) of the fund. The measurement is usually reported for a 12-month time period.
<b>Yield to Maturity (YTM)</b>	The yield to maturity (YTM) of a bond or other fixed-interest security, such as gilts, is the (theoretical) internal rate of return (IRR, overall interest rate) earned by an investor who buys the bond today at the market price, assuming that the bond is held until maturity, and that all coupon and principal payments are made on schedule.
<b>Modified Duration</b>	Modified duration is a formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration follows the concept that interest rates and bond prices move in opposite directions.
<b>Total Expense ratio</b>	The total expense ratio (TER) is a measure of the total cost of a fund to the investor. Total costs may include various fees (purchase, redemption, auditing) and other expenses. The TER, calculated by dividing the total annual cost by the fund's total assets averaged over that year, is denoted as a percentage.
